SAHIL ARYA

9582006504 — sahilarya53@gmail.com — LinkedIn — GitHub — Portfolio

Professional Summary

Software Engineer with nearly 3 years of experience building scalable enterprise applications, data integration platforms, and AI-enabled analytics solutions using React.js, TypeScript, Python, Node.js, and SQL. Experienced in REST APIs, microservices, ETL pipelines, structured and unstructured data processing, LLM integration, and vector-search retrieval. Focused on data quality, performance optimization, and reliable enterprise workflows.

Technical Skills

Programming: JavaScript, TypeScript, Python, SQL, C++
Frontend: React.js, HTML, CSS, Ant Design, Responsive Interfaces, Reusable Components, Dashboards
Backend and Integration: Node.js, Express.js, FastAPI, REST APIs, gRPC, Microservices, API Integration, Error Handling
Data Engineering: PostgreSQL, Redis, Databricks, Delta Lake, SQL Query Optimization, ETL Pipelines, Data Ingestion, Data Transformation, Data Quality
Generative AI: LLMs, Claude Sonnet, Llama 3, Vector Search, Retrieval-Based Document Processing, Structured and Unstructured Data Extraction
Engineering and Tools: Microfrontend Architecture, Distributed Systems, RabbitMQ, OOP, Data Structures and Algorithms, DBMS, Performance Optimization, Git, GitHub, Microsoft Azure

Professional Experience

Polestar Analytics September 2025 – Present
Senior Software Engineer *India*

- Led the migration of a production-scale frontend monolith to a **microfrontend architecture**, enabling **4+ independent teams** to develop and release features in parallel while improving scalability, maintainability, and deployment independence.
- Decomposed a **Node.js monolith into 5+ Python microservices** using gRPC, RabbitMQ, and Redis, enabling asynchronous processing, service isolation, and reliable inter-service communication.
- Engineered and launched **PromoPulse**, an AI-powered enterprise analytics platform that processes Databricks datasets and generates LLM-driven recommendations, scenario simulations, and KPI forecasts for ROI, trade spend, revenue uplift, and campaign effectiveness.
- Developed OCR and document-processing pipelines using Claude Sonnet, Llama 3, and vector-search retrieval to transform unstructured PDFs, invoices, reports, and emails into structured data, achieving **92% extraction accuracy** with support for **128K-token context windows**.

Polestar Analytics November 2023 – August 2025
Software Engineer *India*

- Developed and scaled **1Platform**, an enterprise B2B analytics and ETL SaaS platform using React.js, Node.js, PostgreSQL, Microsoft Azure, and Databricks. Supported **4+ enterprise clients** across data ingestion, transformation, governance, and analytics workflows.
- Built data ingestion, validation, and transformation workflows that automated complex manual SQL operations, reducing data-engineering effort by approximately **90%** and accelerating pipeline creation and execution.
- Improved application performance by reducing API latency approximately **30%**, from 600 ms to 420 ms, through server-side pagination, lazy loading, and optimized Delta Lake queries; reduced per-page payload size from **2 MB to 20 KB**.
- Collaborated with four enterprise clients—Knipper, BDS, Zydus, and Insigneo—to deliver proof-of-concept solutions, workflow automation, analytics features, and customer-specific data platforms.

Projects

PacketLens — React.js, Node.js, Express.js, Socket.IO, Tailwind CSS

- Built a real-time network analysis dashboard using WebSockets to stream live data and classify traffic across **20+ applications** with custom binary parsers and no external packet-library dependencies.
- Designed a multithreaded load balancer with configurable parallel workers and a rule-based traffic-blocking engine supporting IP, application, and domain filtering.

Education

Maharaja Agrasen Institute of Technology August 2019 – July 2023
Bachelor of Technology in Computer Science *Delhi, India*
CGPA: **8.50/10**

Achievements

- Received multiple Quarterly Impact Awards at Polestar Analytics, including **Dashing Debut** and **Rising Star**.
- Received an **Appreciation Certificate** for developing PromoPulse to improve financial analytics for clients.
- Earned the **Databricks Certified Generative AI Engineer Associate** certification.
